

If it's good then keep it

If it's bad then get rid of it

God bless America, what a greedy bunch we are, We've been blessed

above the rest, Lord, what a mess they made, If you love this

world we live in, then it's time to lend a hand, Why must there

be disasters, to turn us from lust and sin, Let's try to work

together, to put the world in order again, It starts with the head

and moves through the body

Begin at the top and stop at the bottom

the bottom

If its good then keep it

If its bad then put it away

If you can't read the signs then you
can't live in the times

The servant is no better than
the master and the master no

better than the servant, In other
words were all the same.

There's no need to create problems
only solutions to the ones we have

So lets try to live in peace and
harmony with the world that we

have. All you have to do is ask

God above, for some of what he
has.
